

TRAUM SAFE
World's Finest Luxury Home Safes

THE
HEIRLOOM

The HEIRLOOM is the most luxurious Swiss bank vault built exclusively for your home and jewelry collection.

HEIRLOOM SAFE

With the HEIRLOOM SAFE you have the finest Swiss bank vault in your home. For significant assets, we highly recommend this extraordinary safe.

From the leading manufacturers of bank safes and vaults in Switzerland comes our most exclusive safe. Large-scale basic research, including the testing of new materials and the use of the latest technology, has led to a patented product whose security level is unique. The HEIRLOOM is approved for bank use in Switzerland and major Swiss banks use this system in their safes and vaults.

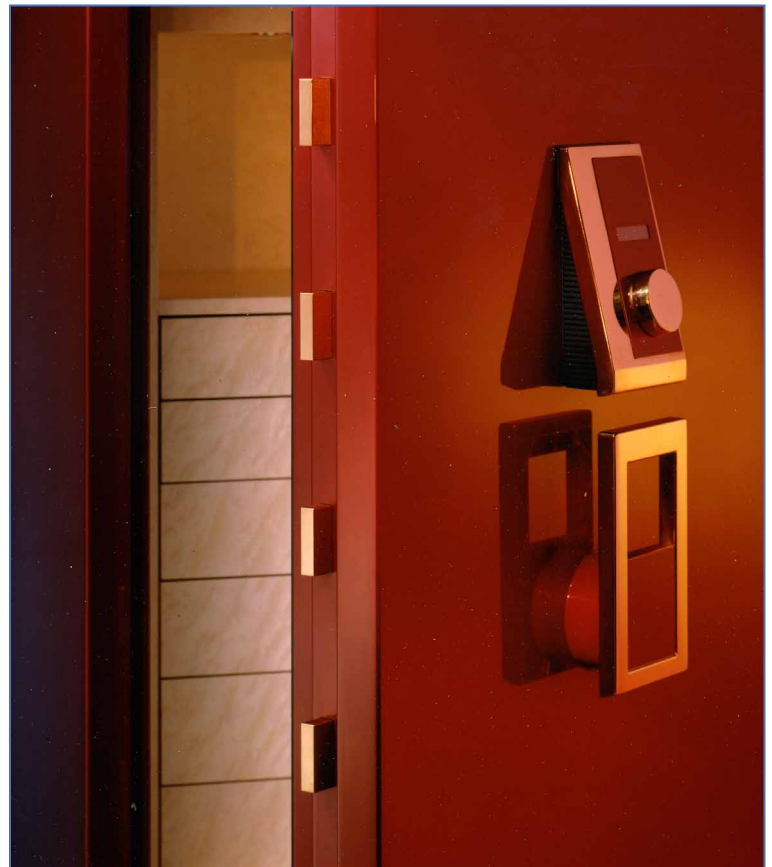

The walls of the HEIRLOOM are considered practically invincible, as they are built with an intelligent, multilayer armoring called Relastan. Just three and a half inches of Relastan provides greater defense than conventional bank vault construction.

The HEIRLOOM features a patented, dual electronic locking system. This interactive lock offers the highest possible security, yet is simple to operate. It integrates a smart connection to your home alarm system with many features.

The HEIRLOOM is also our most luxurious safe. From the vibrant lacquers, to the finest handcrafted woods, to soft, pliable leathers, we spare no effort to make this beautiful safe just perfect for you. With its clean lines, the HEIRLOOM fits seamlessly into both traditional and modern homes.

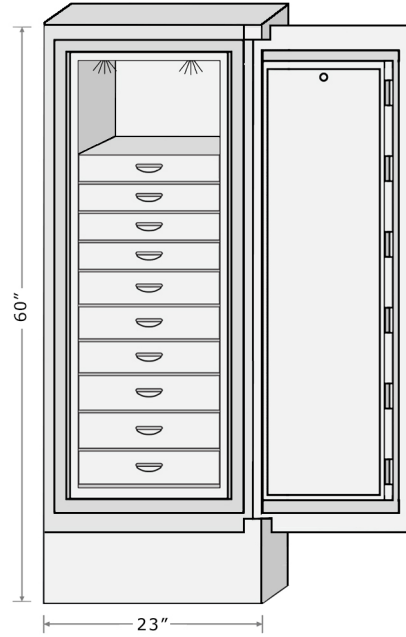

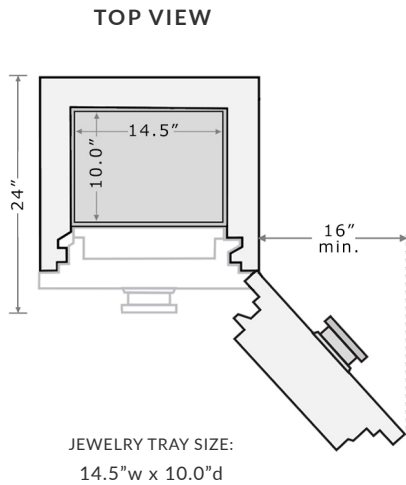

With custom designed inserts for jewelry, winders for watches, and special compartments for documents, the HEIRLOOM has it all.

Contact us and our experts will assist you every step of the way.

STANDARD SIZES

HEIRLOOM I

HEIRLOOM I-60

SIZE: 60"h x 23"w x 24"d

WEIGHT: 1500 lbs.

The HEIRLOOM is a bespoke safe; we build and finish each one individually to meet your unique needs.

The safe sizes depicted on these two pages are our standard offerings, but we can accommodate custom sizes as needed.

Please note that custom sizes may have longer lead times. Any of our safes can be ordered with a left hinge.

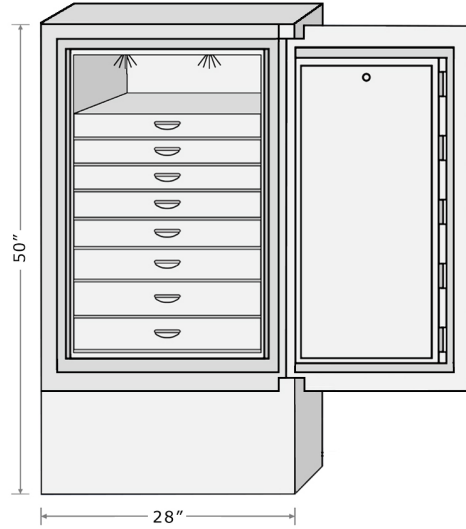

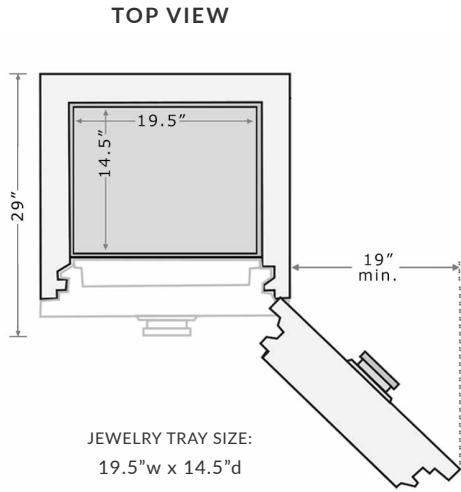

To make it easier for your architect or designer to fit your safe into their plans, we can provide CAD drawings upon request.

While the safe interiors depicted are the typical layouts, we will work with you to custom design the interior to accommodate your personal collection. Our safe interiors can be outfitted with automated watch winders.

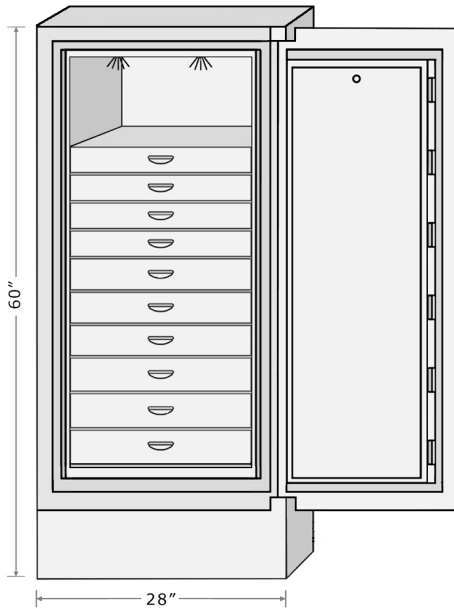

For added security, your safe can be bolted down and connected to your home alarm system.

We offer in-home consultations to measure your space and to find the perfect location for your safe.
