THE
COSMOPOLITAN I-60

COSMOPOLITAN SAFE

The heavy door of the COSMOPOLITAN SAFE swings effortlessly into the safe body, making this innovative model the perfect solution for smaller spaces. You will be comfortable getting dressed and putting on jewelry without a bulky door in your way.

An interior designer's dream, the COSMOPOLITAN can easily be fit inside cabinetry and tight niches because of its compact footprint and convenient design. We can even engineer and manufacture this safe in custom sizes to tailor fit your space.

The COSMOPOLITAN features an intuitive electronic locking system that makes accessing your jewelry and watches simple. Naturally, the safe can be bolted down and comes wired for connection to your home alarm system for added protection.

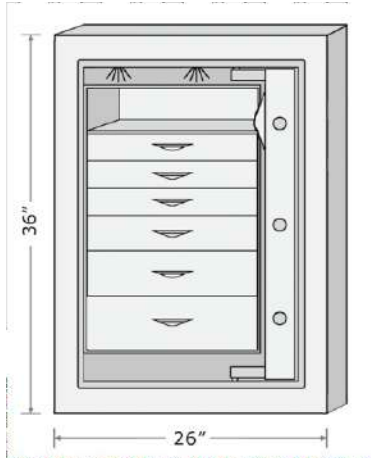

The interior of the COSMOPOLITAN is completely bespoke and will be designed based on your individual collection of jewelry and other valuables. Outfit your safe with our legendary jewelry trays to organize your pearls, rings and earrings. Display and protect your expensive watches with our advanced, automatic watch winders.

To fit the safe into your home décor, you may customize your exterior lacquer, interior wood, hardware and tray lining by selecting from our extensive finish options or by providing us with a sample to match.

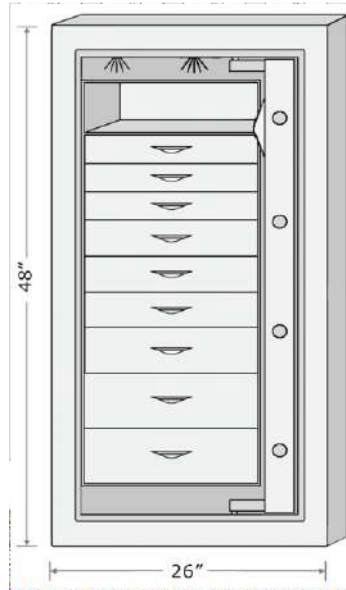

Simply contact us and our experts will assist you every step of the way.
